Professional Profile

Passionate frontend developer focused on building responsive, modern, and user-friendly web applications using React, JavaScript, Tailwind CSS, and TypeScript. I enjoy turning ideas into interactive digital experiences and continuously improving my skills through real-world projects and hands-on development. Strong interest in scalable frontend architecture, UI/UX-focused development, animations, and collaborative problem solving. Currently seeking an internship opportunity to contribute, grow, and gain professional industry experience while building impactful products.

Technical Skills

Projects

EduCommerce Platform

Built a responsive education-themed frontend website featuring modern layouts, clean UI sections, navigation flow, and optimized responsiveness for different screen sizes.

Live: <https://chrisdanvic1.github.io/Commerce/>

Dynamic Ticket Generator App

Developed a JavaScript-powered ticket generator application with interactive UI behavior, user input handling, responsive layouts, and dynamic content rendering.

Live: <https://chrisdanvic1.github.io/Ticket-Generator/>

Animated Personal Portfolio

Designed and developed a modern animated portfolio website showcasing projects, frontend development skills, responsive design techniques, and creative UI presentation.

Live: <https://deluxe-souffle-974cf0.netlify.app/>

AI Chat Interface Clone

Built a ChatGPT-inspired responsive AI chat interface using React and Tailwind CSS with reusable components, interactive messaging layouts, dark theme styling, and frontend-focused architecture.

Live: <https://chatgpt-uip.netlify.app/>

Creative Experimental Portfolio

Created a visually styled experimental portfolio project to explore frontend layouts, animation concepts, responsiveness, and modern web UI structure.

Live: <https://glistening-seahorse-e48d4b.netlify.app/>

Multi-Page Business Landing Website

Developed a responsive multi-page landing website with connected navigation pages, structured sections, responsive layouts, and improved frontend page flow implementation.
